

PRODUCT PROFILE # 507

PT61 Power Transformer – 220 VAC to 16.5 VAC

The PT61 is a Class II power transformer used with the Model PS51 Power Supply and with MIL PAC models with 220 VAC requirements for the MP01 Monitor PAC and BP01 Battery PAC. The temperature rating is -40 to +66 degrees C (-40 to +150 degrees F), 100% relative humidity. The unit weights 1.5 pounds (.68kg) and has mounting holes. The input is three wires (no plug) with the output being either two wires or screw terminals.

FEATURES

Input:

- 192 to 242 Volts AC Input
- 50 to 60 Hertz
- 0.2 Amp Draw Maximum

Output:

- 16.5 VAC Output
- 15 VA Output Power
- 1.5 Amp Max Current
