

<p>PRODUCT RETIREMENT NOTICE</p>	<p>INTREPID™ MicroPoint™ Cable Fence Detection System</p>
---	--

In 2010, Southwest Microwave introduced the **INTREPID MicroPoint II** fence-mounted intrusion detection systems as a new generation alternative to the original MicroPoint Cable. This upgrade offers superior, field-proven intrusion detection and nuisance alarm prevention along with the following enhancements for improved performance:

- A highly user-friendly Universal Installation Service Tool
- Single-platform networking with our **MicroTrack™ II** Buried Cable Detection System and **MicroWave 330** Digital Microwave Link
- Flexible system control options, from simple relay monitoring to multi-site, graphic-based controllers with local or remote monitoring capabilities
- High-level interface to today’s leading PSIM and VMS control solutions
- A comprehensive 5-year Manufacturer's Warranty

Southwest Microwave and our Certified Systems Integrators been actively promoting MicroPoint II for new projects, and these technologies are now protecting critical infrastructure and high value assets at security-sensitive sites worldwide. While we have continued to make original MicroPoint Cable system hardware available to Customers for spares and replacement parts for as long as possible, this notice serves to confirm that in February 2018 we will officially be retiring this technology, though we will continue to support repairs through 2021.

Our Technical Sales Team can support you in upgrading your current MicroPoint fence detection system(s) to MicroPoint II. We encourage you to **Contact Us** to discuss your project needs so that we may prepare a new system proposal for your consideration.

INTREPID MicroPoint End of Life Timeline

Hardware Availability for Spares and Replacement Parts	Through February 2018
Repair Service	Through 2021, contingent upon availability
Technical Support	Life of system
