# 26A1130 Wire Tie Tool

---

The wire tie tool is used with the steel wire ties (26A1128) to attach the INTREPID™ MicroPoint™ MC315 armored cable to various types of fencing materials.

Producing 2½ twist per pull, this tying tool is designed to give maximum pull strength with minimal effort. The red plastic handle was designed for comfort and visibility.

The wire tie tool is 12.5 inches (31.75cm) long and weighs .75 lbs. (0.34kg).

The steel wire tie wraps around the MC315 cable and the fencing fabric. The wire tie tool is put through the loops of the ties and pulled to hold the cable firmly in place.
